## Table of Contents

## Purpose

This document presents an overview of the major work locations of the Executive Branch of the Federal Government within the United States, providing the public and analysts access to commonly requested information about the different work locations of the Federal Workforce.

This document presents basic data, in the form of tables and graphs, on the major work locations within the United States for the Executive Branch of the Federal Government.

## Coverage

The Office of Personnel Management (OPM) data coverage is often equated to the Federal Executive civilian workforce. The coverage is in fact exclusively Federal and civilian. The data exclude a few major components of the Executive Branch (most notably the Postal Service and many intelligence agencies) and include some parts or components of the Legislative Branch and Judiciary Branch. OPM data also do not include contractors and contract employees.

For specific exclusions and inclusions, visit FedData on the OPM's website: http://www.opm.gov/feddata/html/sdminfo.asp.

## Important Information about the Data

This paper looks at Non-Seasonal Full-Time Permanent (NSFTP) Employees only. NSFTP includes all employees working a 40-hour work week year round with no absolute end date. Non-seasonal Full-Time Permanent (NSFTP) employees make up the majority of the Federal workforce, over 89%. NSFTP counts are comparably the least susceptible to seasonal variation. The implication is that NSFTP statistics offer the best month-to-month comparisons. The data in the following section are restricted to NSFTP. Furthermore, the data are also restricted to employees in pay status (employees receiving a paycheck). [1] The data in the section below represent Fiscal Year 2014, which, in the Federal Government, ended on the 30th of September 2014. Lastly, it is important to note that the data reflect places of employment, not places of residence.

## Data

This section presents basic data, in the form of tables and graphs, on the major work locations within the United States for the Executive Branch of the Federal Government.

[1] Data are always filtered to employees in pay status, meaning only employees currently receiving a paycheck are included.

## Additional Details

For any data requests, the OPM produces an online data tool, FedScope, which is updated quarterly: http://www.fedscope.opm.gov/. Most of the tables above can be replicated in FedScope, with the option for much more detail. The tool is best operated in Internet Explorer. For all other inquiries, contact DAG through FedStats at FedStats@opm.gov.
